

## Bridging work for Art and Design A-Level.

Over the summer please collect images of organic forms. You should get these images from a range of sources not just the internet and put them into a scrap book. You should also include any shapes, colours or patterns that you like. You could also make your own collection of organic forms.

You should also look for artists that work with organic forms both in drawing, painting and sculpture as well as photography. Include artist's names and examples of their work in your scrap book. Take your own photographs and include these.

Try to visit an art exhibition or museum over the holidays and include the visit in your scrap book.

This scrap book will be used as a tool to inspire your own work on return in September so please take this task seriously.

Organic Forms fur stones seed pods spirals fruits sticks water **SNOW**  
crystals earth sand trees cells leaves feathers pine cones wind  
shells particles nuts vegetables ivy fish coral fossils teeth bones  
rain **HAIR** Sea forms mud ice
