EDUCATION AND CHILD PSYCHOLOGIST

This is not an exhaustive list and can be adapted to suit each family, families with multiple age groups may need to be creative with timetable time to accommodate each child.

Your child's school maybe scheduling online classes at a specific time if this is the case you can interchange with other blocks of time.

Parents can adjust the timetable to accommodate their child's personality and age. For example younger or more active children may need shorter sessions with more frequent short breaks scheduled in.

There are lots of apps and online resources for each session.

Good Luck!!

If you have any questions about the timetable or need advice join this group
